

Heavy cropping, delicious plum shaped tomatoes excellent for soups, tomato juice, ketchup or just eating cold.

Very thick and juicy!

Indoor Planting:

Sow seeds 1.5cm deep in pots or trays of moist compost, be careful not to over-water. Store in a warm location at an approx. temperature of 18°c (65°f). When the seedlings are approx. 6-9" tall, the plants can be moved to an unheated glasshouse in April or hardened off and planted out from June.

Support the plants when needed and remove side shoots as they appear.

Feed regularly with a tomato feed.
