# unwins Gro-Sure®

## Tomato. Superb.

### RECOMMENDED

- Extra sweet flavour
- High yields and long cropping season

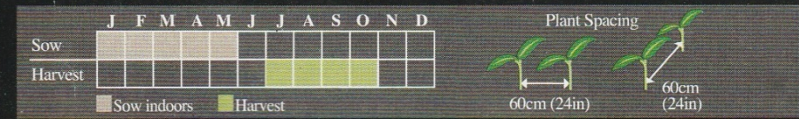

Sow Jan-May  
Harvest Jul-Oct

# unwins Gro-Sure

Guaranteed to give the best results for your garden. Gro-sure® seeds have been selected for their germination, vigour, disease resistance and ease of sowing.

## Tomato. Superb F1 Hybrid.

An exclusive from Unwins, this intensely sweet flavoured tomato is simply divine. Vigorous and disease resistant with high fruit numbers per truss, this is truly the one to grow. Perfect eaten as a snack or sliced in half in your summer salad.

#### Sowing Time

January – May

#### Sowing Indoors

Almost fill a seed tray with moist seed compost. Sow thinly over the surface and lightly cover them with a little more compost or sow individually into a module tray. Place in the warmth 18–20°C (65–70°F) and keep moist.

#### Transplanting/Growing On

Keep seedlings in a light position but shade from direct sunlight. When large enough to handle, transplant seedlings individually to small pots of potting compost and maintain a minimum

temperature of 15°C (60°F). When the first flowers have opened transfer to grow bags, or the greenhouse border. Allow 60cm (24in) between plants.

#### Aftercare

Trial plants up canes, using strings or wires. Remove side shoots as they appear.

#### Harvest

July – October

#### Special Note

Water plants generously and regularly. When first fruit start to swell, feed weekly with a tomato fertiliser.
