TOMATO TERENCE F1 HYBRID

Solanum lycopersicum L 'Terenzo' F1 Hybrid Common name: Tomato

A high yielding red cherry 'Tumbler' type with a gentle tumbling habit, ideal for baskets and containers. Floriferous plant producing high numbers of sweet, red, 20g (¾oz) fruits which resist splitting. AAS winner for its high yields, quality fruit and excellent flavour.

- Flavour guide: Sweet and juicy
- Ideal for baskets/containers on the patio or in the greenhouse
- Sow March-April, or February for early crops in heat
- No support, pinching out, or sideshooting required
- Pick fruits regularly to extend the picking season
- Height 40-50cm (16-20in) with a gentle tumbling habit

SOWING INSTRUCTIONS Place seed on the surface of a free-draining compost and cover with about 6mm (¼in) of compost or vermiculite. Place in a propagator at 18-21C (65-70F) until after germination, which takes 7-10 days.

GROWING INSTRUCTIONS Maintain temperature at about 15C (60F). Transplant seedlings when large enough to handle into 7.5cm (3in) pots. Plant in final position when plants are 10cm (4in) high.

For indoor crops plant into growbags, baskets or containers. For outdoor crops, acclimatise plants to outdoor conditions for a few days before planting in containers for the patio, or in sunny, fertile, moist, well-drained soil, after all risk of frost. Feed plants weekly with high potash tomato fertiliser once first fruits have set. It is not necessary to pinch out growth or to sideshoot. Harvest regularly to promote further flowers and extend the picking season.

T&M RECOMMENDS
Storing seed in a cool, frost-free area, out of direct sunlight, in an airtight container.

Standard Seeds - complies with EC rules and standards Origin U.K.
