TOMATO TUMBLING TOM RED

Solanum lycopersicum L. Tumbling Tom Red Common name: Tomato

A truly trailing Tomato. Perfect for tubs and patio containers, cascading out of a hanging basket. Cherry sized, sweet and juicy fruits are produced in abundance throughout the summer. No sideshooting or training required.

- **Flavour guide:** Sweet and juicy
- **Early crops in basket and containers**
- **Sow indoors:** January to March; **outdoors:** March to April
- **No support or sideshooting required**
- **Harvest July to October**

SOWING INSTRUCTIONS Sow seeds 6mm (¼ in) deep in pots or trays of good, free-draining, damp, seed compost and cover with a sprinkling of vermiculite or compost. Place containers in a propagator, or seal in a polythene bag, at a temperature of 18–21C (65–70F) until after germination, which takes 7–10 days.

FOR INDOOR CROPS Plant finally into tubs, containers or hanging baskets in the greenhouse or conservatory. Water regularly and feed weekly with high potash tomato food once first flowers have set.

FOR OUTDOOR CROPS Acclimatise plants to outdoor conditions for a few days before planting into tubs, containers or hanging baskets. Protect from cold winds until established.

Tomatoes are packed with antioxidants and high in Vitamin A and C, and lycopene, all helping to stimulate your body's immune system.

T&M RECOMMENDS
Storing seed in a cool, frost-free area, out of direct sunlight, in an airtight container.

Standard Seeds - complies with EC rules and standards Origin U.K.
